

Overview

This one-day course is designed to provide an awareness and overview of the techniques used by Forensic Anthropologists in Human Skeletal Anatomy and Comparative Anatomy and the role they play in an investigation.

This course is approved for CPD certification by The Chartered Society of Forensic Scientists.

Who is this Course for?

This course is designed for those seeking to continue their professional development.

This includes:

- Crime Scene Managers, Crime Scene / Forensic Investigators,
- Police Search Advisors, Licensed Search Officers and Major Crime Investigation Team
- Scientific Support Managers and Forensic Service Managers
- Undergraduates and Post-graduates studying forensic anthropology and archaeology or forensic science

Certification

Upon completion of this course, 8 Continual Professional Development (CPD) credits will be awarded.

Human Skeletal Anatomy and Comparative Anatomy

1 DAY
TRAINING COURSE

Course Aims

The aims of these courses are:

- 1.**
To provide an introduction and overview of the techniques used by Forensic Anthropologists to identify human vs non-human skeletal remains
- 2.**
To assist police personnel and forensic practitioners in making an initial on scene assessment as to whether or not skeletal remains may be human or non-human before seeking professional advice
- 3.**
Understand how our bones develop and change appearance as we age.

Dr Micol Zuppello
PhD, MSc, BSc, FRAI,
cert-FAII
Forensic Anthropologist

Course Modules

- Understand the role of a Forensic Anthropologist
- Introduction to human skeletal identification – including adult vs juvenile human remains
- Introduction to identifying human vs non-human skeletal remains
- Practical sessions which put theory into practice with access to an extensive non-human and archaeological human skeletal collection.
