

Cell Site Analysis Awareness

Overview

This half-day awareness course on the Introduction to Cell Site Analysis provides a basic overview and awareness of the processes used and methods applied in conducting Cell Site Analysis.

Who is this course for?

This course is designed for anyone in the criminal justice system who conducts investigations including:

- Senior Investigating Officers
- Detectives
- Officers in charge of investigations
- Police Constables

This course can also be useful to barristers and analysts for learning about the basics of Cell Site Analysis and RF Surveys.

Course Aims

1.

To provide a greater understanding of how Cell Site Analysis works.

2.

Give clarity on what Cell Site Analysis can achieve, the benefits and limitations of using it in an investigation.

3.

Help investigators or legal professionals understand the process and evidence produced in this area.

Carl Osborne
